

10 SIGNS you need a new plastic injection molding partner

Is your supplier holding your business back?

Unpredictable or Rising Cost

Does your current partner lack transparency, frequently change prices, or refuse competitive pricing?

Missed Delivery Deadlines

Are late deliveries consistently disrupting your production schedule?

Quality Inconsistencies

Are you seeing recurring defects, high scrap rates, or poor part tolerances?

Poor Support & Communication

Is your current partner slow to respond, lack transparency, or difficult to work with?

Limited Prototyping Capabilities

Does your current partner offer rapid prototyping, DFM, and aluminum prototype tooling?

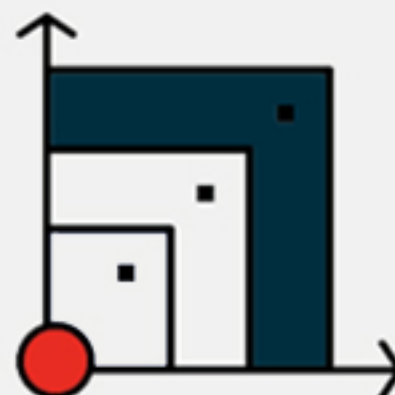

Outdated Tech & Equipment

Does your current partner use modern molding techniques, automation, and monitoring?

Lack of Industry Experience

Is your partner struggling with compliance, material selection, or technical requirements?

Scalability Issues

Can your current partner scale production, or do they lack the capacity for large-volume orders?

Limited Secondary Services

Does your partner offer assembly, packaging, pad printing, or supply chain integration?

No Commitment to Improvement

Does your current partner resist feedback, lack lean practices, or refuse process investments?
